

# Quartz Flooring Systems

seamless heavy-traffic coatings

- Superior Durability
- Excellent Traction
- High Impact & Chemical Resistance
- Suitable for Interior/Exterior Applications

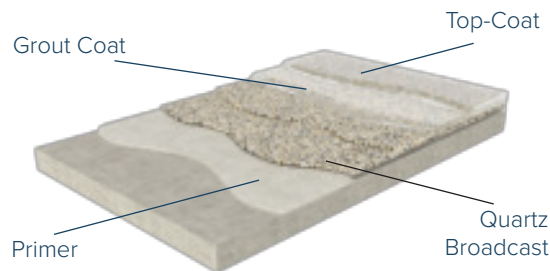

# QUARTZ FLOORING SYSTEMS

Seamless quartz flooring systems are among the most durable floor coating options available today. Ideally suited for high traffic environments requiring superior performance, they combine extremely hard colored quartz aggregates with performance resins to create impact & abrasion resistant flooring that can be modified for minimal to heavy texture depending on the application.

Colored quartz aggregates are completely UV stable and can be incorporated into interior or exterior coating applications. Select from 8 standard color blends or customize your very own to perfectly match the aesthetics of your environment.

## APPLICATIONS:

- » Walkways
- » Stadium Concourses
- » Loading Docks
- » Food Prep Areas
- » Parking Garages

## CHIP COLOR BLENDS

CHESTNUT

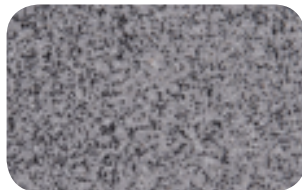

RUSSET

SAGEBRUSH

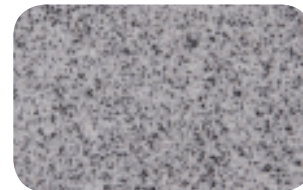

INDIGO

ANCHOR

ROCKLEDGE

STONEWALL

OZARK

## PROVEN PRODUCTS

Resinwerks manufactures sustainable, environmentally-friendly materials that are safe for use in residential environments. Proudly made in the USA, our products undergo stringent quality testing prior to installation to ensure your floor performs as good as it looks. Consult with one of our approved installers to design the system that best fits your needs.

**Vapor Barrier Epoxy™**  
primer for elevated  
moisture vapor emissions

**TrueClear EP™**  
thick-build cycloaliphatic  
water-clear epoxy

**Kinetic™**  
highly durable, flexible and  
UV stable grout/topcoat

**HDC 100™**  
abrasion resistant, satin finish  
urethane top-coat
